From: Jeff Barrow, Assistant Director of Facilities

Subject: Diversified Electrical Systems, Inc

---

We have worked with Diversified Electrical for many years. Our work with them includes projects of all types and sizes. The scopes have varied from small to large. Some examples are:

- Plantation Key School Technology Retrofit
- Key Largo School new service for seven relocated portables
- Power wiring for class room projectors
- Coral Shores HS courtyard lighting upgrade
- Coral Shores HS power wiring for new AC units

On all projects regardless of the size Diversified responded and got the job done in a timely manner. They are very well run and require a minimum of direction from our staff. I feel like I can review the job with them and turn them loose to get the work done. I appreciate that level of professionalism.

Because of their knowledge of working around schools, their dependability, and their professionalism I would highly recommend them for this kind of work. My contact information is listed at the top of this note and I would be happy to answer questions regarding this contractor.
