To Whom it May Concern:

I am writing concerning the qualifications of Diversified Electrical Systems, Inc. As Program Manager overseeing all capital construction projects for the Okaloosa County School District for the past 12 years, I've been extremely fortunate to have the opportunity to work with Diversified on numerous projects. We were so impressed with their quality workmanship and personnel that when our company renovated our offices to upgrade our electrical and structured cabling systems, we hand picked Diversified to do the work. We save all the mission critical, difficult projects for their experienced electricians. They researched, tested and installed completely new grounding systems at over 30 schools in Okaloosa County. Once completed, the number of lightning related outages dropped by over 75% immediately as a testament to their successful completion of the work.

In an environment where on-time performance and within budget are the most critical parameters, they have never failed to meet the strict requirements of every project. They work to minimize change requests and, when required, are always fair and just in determining the value of the additional work.

Diversified Electrical Systems, Inc. has been one of our pre-qualified bidders for years and we hope to continue our working relationship with their firm for many years to come. They are the "go-to" firm because of their dependable personnel and their demonstrated ability to handle complex projects.

Sincerely

Mr. Joel A. Lindner
Program Manager
Okaloosa County School District - Total Program Management
